Power Through Knowledge

We just can't stop training...

We offer a **Live Interactive** training course over the web.

The only requirements are a computer, and a basic webcam.

Not only can you see the tutor in **real time**, but you can also talk to him through the microphone on your **FREE headset**, so he can answer questions just as if you were in the room with him.

All the daily tests are also completed on the system, and will instantly show the results that you have achieved.

The advantage to this online training is that you will be live from your own home or office. Also you will save money on the traveling expenses, and accommodation.

If you would like more information on interactive training then **please call us on 01223 480 007**

This is a live whiteboard where you will see everything that is written by the trainer in the class room, plus graphs and diagrams.
